Java Servlet 3.1 API Specification

Servlet API Documentation

Package	Description
javax.servlet	The javax.servlet package contains a number of classes and interfaces that describe and define the contracts between a servlet class and the runtime environment provided for an instance of such a class by a conforming servlet container.

描述和定义servlet类和由servlet容器提供的运行时环境之间的契约

Other Packages

允许用户使用注解来声明服务器端程序(servlets)、过滤器(filters)、监听器(listeners)并为声明的组件指定元数据

Package	Description
javax.servlet.annotation	The javax.servlet.annotation package contains a number of annotations that allow users to use annotations to declare servlets, filters, listeners and specify the metadata for the declared component.
javax.servlet.descriptor	提供以编程方式访问web应用程序的配置信息(来自web.xml描述符) Provides programmatic access to a web application's configuration information that was aggregated from the `web.xml` and `web-fragment.xml` descriptors.
javax.servlet.http	The javax.servlet.http package contains a number of classes and interfaces that describe and define the contracts between a servlet class running under the HTTP protocol and the runtime environment provided for an instance of such a class by a conforming servlet container.

描述和定义运行在HTTP协议下servlet类和由servlet容器提供的运行时环境之间的契约
